

Ceiling Fans

Call today for an estimate! (813) 662-0362

- **ON-LINE Electric does their best to provide the most accurate over-the-phone estimates.**
- **Our professional service technicians will give the final price on your service.**
- **If you reject the price/service, there is no charge for the visit. Below is helpful information to have before you call:**

Is there wiring to the location where the fan is to be installed (is it prewired)?

If there is an existing fan/light fixture or a cover/cap on the ceiling, there is existing wiring.

How high (approximately) is the installation location?

If above 15 ft, there is an additional cost added to the service, as there will be the use of an extension ladder and an additional technician for the service. Residents are not allowed to participate in the installation, as we are a licensed and insured LLC.

Is there anything in the way that is not movable?

Staircases, countertops, islands, heavy furniture cause the installation to be more intrusive and additional charges will occur.

If wiring is needed to the installation, is there attic access?

What is included in ceiling fan installation pricing?

ON-LINE Electric includes taking down old fans/fixtures, assembly of the new fan(s), installation of the new fan(s), remote control set up (if it has one), attachment of fixture to the fan, installation of down rods, and a one year warranty on the work that ON-LINE Electric performs (the warranty does not apply to the fan itself).
