

# **Panels/Breaker Boxes**

ON-LINE Electric performs estimates for residential as well as commercial panel/breaker boxes.

THE ON-SITE ESTIMATE WILL TAKE ABOUT AN HOUR

ON-LINE Electric's technicians are available to speak one on one with our customers by phone or by a free on-site estimate to discuss the job and explain details.

Ball park estimates can be given by phone but exact pricing has to be determined by the technician at the time of the on-site evaluation.

The power will be out for however long it takes to complete the actual panel/breaker box job.

ON-LINE Electric schedules these jobs in the morning, as it can take anywhere from 5 - 6 hours to a whole day to complete.
